## WORK EXPERIENCE

### Laguna Metts Corporation

May 2024 - July 2025

#### IT Staff/ Programmer

- Developed and implemented a web-based Inventory Management System to track IT assets, handling both front-end and back-end development.
- Provided technical support for hardware and software issues across the organization.
- Managed Active Directory accounts, including user access, group policies, and permissions.
- Performed regular server backups and ensured data integrity and availability.
- Responded to support tickets promptly, diagnosing and resolving technical issues to minimize downtime.

### Premier Software Enterprise, Inc.

October 2023 - February 2024

#### Software Developer

- Implemented and enhanced system features to improve overall functionality and user engagement.
- Designed and built dynamic, interactive user interfaces for the website to improve usability.
- Performed regression testing and resolved bugs to maintain system stability and performance.

### AL Software Solutions Vision | WFH - Australlian Base Organization

October 2022- December 2022

#### Internship- QA Tester

- Conducted functional testing on newly developed systems to identify bugs, errors, and usability issues.
- Assessed system responsiveness across devices and platforms to ensure a smooth user experience.
- Documented identified issues with clear descriptions and steps to replicate for the development team.
- Received training in graphic design using Adobe Photoshop and created promotional materials for social media campaigns.
